

In the Specification

Please replace the first full paragraph of Page 6, Lines 3-10:

The present invention will now be described in more detail with references to the figures. FIG. 1 is a schematic diagram of a set top box 10 according to the preferred embodiment of the present invention. The set top box receives encoded television signals either from satellite receiver 11a or cable feed line 11b, which is fed to a tuner/demodulator 12 for receiving digital signals. Tuner/demodulator 12 tunes to the frequency of a broadcast stream that is selected by a user. The tuner/demodulator 12 ~~feeds~~ feeds into a MPEG-2 decoder 13a in a central processing unit 13 in set top box 10. The tuner 12 tunes to the frequency of a selected MPEG-2 transport stream, which is then decoded in the MPEG-2 decoder 13a and fed to the television.
